

OmniWealth Kadai vs VelSoft

Feature comparison for the LB Cards / Kavin Store pilot · 03 September 2026

OmniWealth Kadai is the offline-first billing + stock app built for the two Kanyakumari pilot shops. This sheet maps it against VelSoft, the Windows / LAN billing software LB Cards uses today. **Yes** = fully built and in use. **Partial** = present but lighter, or handled a different way. **No** = not built (the last two sections explain the deliberate omissions).

1. Billing at the counter

Feature	OmniWealth Kadai	VelSoft
Barcode scan to add an item	Yes	Yes
Search-to-add by name	Yes	Yes
Edit rate / quantity at the counter	Yes	Yes

Presumptive income tax (s.44AD) estimate	Yes	No
Advance-tax instalment reminders	Yes	No
Inter-state (IGST) billing	No	Yes

7. Reports

Feature	OmniWealth Kadai	VelSoft
Day book — every transaction, chronological	Yes	Yes
Item-wise sales profit (qty, sale, cost, profit, %)	Yes	Yes
Cash book with running balance	Yes	Yes
Profit & Loss (sales – cost of goods – expenses)	Yes	Yes
Sales summary — day / yesterday / 7-day / any range	Yes	Yes
Fast movers & dead stock	Yes	Partial
Low-stock and expiry alerts (with WhatsApp digest)	Yes	Partial
Receivables / payables outstanding	Yes	Yes
Trial balance	No	Yes
Balance sheet	No	Yes
Bank reconciliation / bank ledger	No	Yes
Accountant export — one multi-section CSV	Yes	Partial
Accountant export — Tally import XML	Yes	Partial

8. Printing

Feature	OmniWealth Kadai	VelSoft
Print receipt on 58 / 80 mm thermal roll	Yes	Yes
Shop name / address / footer on the bill	Yes	Yes
Send the receipt on WhatsApp	Yes	No
Direct Bluetooth thermal printer	Partial	Yes

9. Platform & data

Feature	OmniWealth Kadai	VelSoft
Works fully offline at the counter	Yes	Yes
Automatic cloud sync across devices	Yes	No
Runs on any Android phone	Yes	No
Multiple counters / devices, same data	Yes	Partial
One login, owner + staff roles	Yes	Partial
Built-in AI assistant (ask about stock, sales, GST)	Yes	No
Product name auto-filled from an online barcode catalogue	Yes	No
Import products / customers / orders / expenses / purchases	Yes	n/a
Automatic encrypted daily off-site backups	Yes	Partial

What Kadai does that VelSoft doesn't

- Runs on the phone in your pocket — no Windows PC, no LAN cabling.
- Keeps billing with the internet off; syncs the moment it's back.
- Every counter and phone sees the same customers, stock and bills automatically.

- Ask-AI in plain language: “how much GST this month?”, “what’s not selling?”
- Send the bill to the customer on WhatsApp in one tap.
- Snap a photo of a supplier’s bill and it books the purchase + GST credit.
- WhatsApp reminders to customers who owe money on khata.
- One-tap CSV / Tally export straight to the accountant.
- Encrypted daily backups to off-site storage, with no one having to remember.

Deliberately not built (by design)

- **Full double-entry accounting** — general ledger, trial balance, balance sheet. Kadai feeds the accountant clean registers + a Tally export instead of trying to be the accounting software.
- **Bank ledgers, cheque handling, bank reconciliation** — the pilot shops don’t use cheques; UPI reconciliation is built in its place.
- **Loyalty points / membership cards.**
- **Inter-state (IGST) billing** — both pilot shops are local (intra-state).
- **Wholesale / multiple price tiers** per item.
- **Promotional “scheme” pricing engine.**
- **Bill series (A / B / C).**

Prepared for the OmniWealth Kadai pilot (LB Cards, Kavin Store). “Kadai” is OmniWealth’s offline billing + stock module. Feature status current as of the date above.
